

EFC ELECTRONIC FLOW CONTROL SYSTEM

Get all the benefits of a variable-speed pump without the expense. The EFC System adjusts jet flow and pressure, allowing bathers to choose their massage quality: vigorous, gentle or pulsation with a touch of a button.

Control Box

20-minute timer
Water level sensor option

SofTouch Button

On/Off
Select massage mode
Back Lit

Let your customers customize their bathing experience with the newest innovation in whirlpool massage; the EFC System provides a variety of massage options for the bather without the noise, expense or reliability issues for a typical variable-speed pump.

The EFC valve easily attaches to the discharge or suction side of most whirlpool pumps with no change required to the existing plumbing.

The EFC System includes our SofTouch controller with backlit LEDs and our EP 840 controller with a 20-minute timer and water level option. All attachments are plug-and-play.

Features

- Modulates jet flow and pressure
- Plug and play connections
- Fits pump discharge or suction
- Simple union installation
- Easy 2-button operation

TAKES THE PLACE OF VARIABLE-SPEED MOTORS

- Butterfly valve opens and closes to regulate water flow to jets
- More quiet than a variable-speed motor
- More reliable than a variable-speed motor

EASY INSTALLATION

- Minimal or no change required to existing plumbing
- Fits discharge or suction side of most pumps
- Easy upgrade for homeowners

COST EFFECTIVE

- Less expensive than variable-speed motors
- Easy plug-and-play installation saves time and money

ADDITIONAL BENEFITS

- Gives OEMs a flexible, cost-effective upgrade
- Helps differentiate your product line

EFC ELECTRONIC FLOW CONTROL SYSTEM

Complete set includes 1 each:
